

SM. | Stems for levelling elements

Steel or stainless steel

STANDARD EXECUTIONS

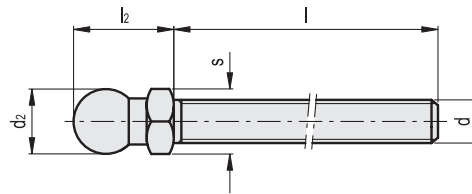

- **SM:** zinc-plated steel spheric articulated and threaded stem with regulation hexagon.
- **SM-SST:** AISI 304 stainless steel spheric articulated and threaded stem with regulation hexagon.

NOTE

To choose the stem see "Tables of the possible combinations Bases/ Stems" on page 984.

The stems are usually supplied in a packing of four pieces compacted by means of a shrink film to avoid any damaging movement during transport.

For big quantities, the stems are supplied in wooden boxes and are placed in order, to avoid any damaging movement during transport.
